Continuation of 1(c) Other: Response to Amendment

The specification amendment filed on September 2, 2008, is considered non-compliant because it fails to meet the requirements of 37 CFR § 1.121, as amended on June 30, 2003 (see 68 Fed. Reg. 38611, Jun. 30, 2003). Applicant is advised to correct the following deficiency:

The specification amendment is non-compliant because it fails to properly show each and every change made relative to the immediate prior version. In this case, e.g., the amendment at page 2 deletes the paragraph on page 15, lines 8-10 and replaces it with an amended paragraph that presents the text "Mark" with underling; yet this text was already present in the immediate prior version of the specification. Then this replacement paragraph presents the text "MARK" without underling; yet this text was not in the immediate prior version of the specification. Accordingly the amendment is non-compliant because it fails to meet the requirements of 37 CFR § 1.121 which states that amendments to the specification by replacement paragraph are required to have "markings to show all changes relative to the previous version of the section. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters."

If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the entire corrected amendment must be resubmitted.
